

## The Patented ITB Snaplock System

Smooth, durable aluminum extrusions featuring Snaplock construction provide superior strength with supports on 4 1/2" centers. This provides smooth, rivet-free interior side walls and floors.

# Grain Body

HAND-CONSTRUCTED  
PATENTED SNAPLOCK PANEL DESIGN  
SUPERIOR STRENGTH

**WORLD'S FINEST  
TRUCK BODY**

*The ITB Grain body's rugged Snaplock construction provides strength throughout.*

Intercontinental Truck Body (ITB) is proud to be the finest specialty body and equipment company in the world. ITB has been manufacturing the most practical, reliable equipment since 1979. We are proud to build our products in Montana's Golden Triangle.

Our Snaplock technology is the superior construction for durability and appearance in the industry today. The patented technology provides a strong, rivet-free side wall.

Our extensive product line includes delivery bodies (parcel and refrigerated), flatbeds, landscape bodies, service bodies and grain bodies. ITB has allocation to order cab chassis directly from Ford, Chevrolet, GMC and Dodge, or accept drop-ships from these and many other chassis manufacturers. We stand behind our truck bodies with a 5-year or 60,000 mile limited warranty.

In addition to the equipment that we

manufacture, ITB is a distributor for well-known brands such as Knapheide, Texoma, Adrian and Anthony; each provides further opportunities to fit our customers' needs.

ITB GRAIN BODIES ARE BUILT with .080" thick aluminum alloy sidewalls and .125" thick aluminum alloy floors to ensure durability. The Grain body is constructed by hand through a patented Snaplock panel system to provide superior strength. With several standard features and convenient options, we're confident that we build a truck to meet your needs. We challenge you to compare the difference in quality, strength, durability, payload and long-lasting appearance.

*Smooth interior panels make unloading and cleaning of the ITB grain body easy.*

## Standard Features

- Aluminum construction
- Smooth interior walls and floor
- Extruded exterior wall and floor supports on 4 1/2" Centers
- Removeable side walls
- 3-Piece end doors
- Metering gate in center rear door
- Removable steel tarp bows
- Unique platform under structure with two additional aluminum rails for attaching steel long sills (for ease and economy of hydraulic hoist installations)

## Optional Features

- Assembled or unassembled
- Lengths from 16' to 24'
- 96" or 102" wide
- Side wall heights of 52", 60", 66" & 72"
- 8" or 10" steel long sills
- Beet gate style rear
- Additional metering gates

## Advantages

- Outstanding strength-to-weight ratio of aluminum allows greater pay load and lower fuel cost.
- No rusting, chipping or peeling
