We are capable of designing a body for your needs. Contact us for more information.

Intercontinental Truck Body (ITB) is proud to be the finest specialty body and equipment company in the world. ITB has been manufacturing the most practical, reliable equipment since 1979. We are proud to build our products in Conrad, Montana.

Our Snaplock technology is the superior construction for durability and appearance in the industry today. The patented technology provides a strong, rivet-free side wall.

Our extensive product line includes delivery bodies (parcel and refrigerated), flatbeds, landscape bodies, service bodies and grain bodies. ITB has allocation to order cab chassis directly from Ford, Chevrolet, GMC and Dodge, or accept drop-ships from these and many other chassis manufacturers. We stand behind our truck bodies with a 5-year or 60,000 mile limited warranty.

ITB Van bodies use rugged Snaplock construction to provide superior strength and appearance.

In addition to the equipment that we manufacture, ITB is a distributor for well-known brands such as Knapheide, Texoma, Adrian and Anthony; each provides further opportunities to fit our customers' needs.

ITB HI-CUBE VANS ARE BUILT with .100" thick aluminum alloy sidewalls to ensure durability. The Van body is constructed by hand using a patented Snaplock panel design system to provide superior strength. With several standard features and many options to choose from, we're confident that we build a truck to meet your needs. We offer a variety of doors, shelving systems, bumpers, lift packages and refrigeration systems to help you customize a truck that works for you, allowing for greater productivity. We challenge you to compare the difference in quality.
